Safety First!

Keeping you safe on the road is our number one priority. We recently had a customer come to us for a routine check up with a car that was just outside the 3 year new car warranty period. We were shocked to discover that one of the wheel bearings was badly disintegrating, a potentially dangerous problem that needed fixing right away. Our customers often assume that problems are less likely to occur with newer vehicles, however the reality is that parts can fail, tyres, shock absorbers, brakes and wipers wear out and fluids run out just as quickly on new cars as they do with older vehicles.

So, here are our Top 3 Winter Safety Tips:

1. Having your car serviced/safety checked every 6 months is important even for newer vehicles.
2. Top up your windscreen washer reservoir regularly and replace wiper blades at the first sign of deterioration – poor visibility in rain is best avoided.
3. Check your tyres for wear, and get your wheel alignment checked if any of them are wearing unevenly – this will only get more expensive if left unattended.

Speaking of Safety...

When you come and see us next time, keep an eye open for the path marked with yellow and black stripes - leading you to the office. Avoid walking through the workshop area, where the cars are on hoists and our mechanics are working, as it may not be safe for you to be there. And that's enough of us playing Safety Police for one newsletter!

If you haven't already, **["Like" Our Facebook](#)** page to keep up with all our news and promotions and find out how you can qualify for a **free gift with your next service**. You'll see some great pics of us giving the workshop floor a Queen's Birthday makeover and creating a lunchroom for our valued mechanics.

We look forward to seeing you all soon.
